

Precision Pulmonary Diagnostic Partners with Oximetry Company to Expand the Availability for Sleep Apnea Diagnosis to the LTL Industry.

FOR IMMEDIATE RELEASE

November 25, 2008

Houston, TX: Precision Pulmonary Diagnostics (PPD) has chosen Oximetry Company LLC as its latest sleep diagnostics partner to further its goal in reducing the prevalence of sleep apnea in the trucking industry. Oximetry Company, headquartered in Clinton Township, MI, offers an exclusive, patented technology to test for sleep apnea in the privacy of the normal sleep environment. Robert Rudowski, MD, CEO of Oximetry Company, has patented the Night Hawk sleep systems' gold standard, FDA approved, technology to perform type 1 sleep studies almost anywhere.

Dr. Mark B. Berger, MD FCCP, upon recognizing the need for the diagnosis and treatment of sleep apnea disorders for professional drivers, founded Precision Pulmonary Diagnostics in 2003. "We are excited to partner with Oximetry Company in offering localized LTL diagnostic services, supporting our efforts in providing sleep apnea testing, equipment, and education for the carriers and their drivers," said Berger, PPD's President.

Oximetry Company's Night Hawk Sleep System will allow PPD to offer its diagnostic service in more locations, building upon its established network of regional accredited labs for the long distance driver. With this new exclusive partnership, PPD can now expand this service for local and LTL carriers at their facility, a designated sleeping room, or even at the driver's home. "This opportunity for sleep apnea diagnosis makes PPD the most easy to use program available," said Berger, "There is no reason for any driver to continue to suffer from fatigue due to a sleeping disorder that can now be identified and treated almost anywhere."

About Precision Pulmonary Diagnostics

Precision Pulmonary Diagnostics (PPD) is committed to the diagnosis and treatment of sleep apnea in commercial drivers/operators, resulting in improved driver health and safety and significant return on investment for their employer. Headquartered in Houston, Texas,

PPD's patent-pending programs allow administration of employer-driven sleep apnea programs that include web-based screening tools, diagnosis, treatment and monitoring of this highly prevalent condition.

About Oximetry Company, LLC

OXIMETRY COMPANY was established in 2000 by Dr. Robert W. Rudowski II MBA PhD to address a growing shortfall in the home pulmonary testing arena. At the time a durable medical equipment provider (DME) needed a third party oximetry test to verify need for the purposes Medicare reimbursement for home oxygen therapy. The difficulty came due to a shortage of Independent Diagnostic Testing Facilities willing to perform the testing required because the reimbursement did/does not cover the cost of testing. Dr. Rudowski developed a method to make this possible and has since been performing tests in all 50 states on literally hundreds of thousands of patients.
